

MagniLink iMax

Use your Mac to the max!

MagniLink iMax provides magnification, contour enhancement and pointer settings as well as screen reading with high-quality speech output. The Contrast Enhancement Mode gives a clear picture with smooth character edges regardless of the magnification.

A variety of solutions made to meet the users own preferences. split screen, dual screen support, full screen mode, multiple high contrast modes, a circular and a squared lens-zoom, document reader and the possibility to save texts as mp3-files Together with MagniLink iMax, your Mac also works as a document reader through the unique GhostReader function. You can then save texts as Mp3-files to be played in iTunes, be uploaded to your iPod, iPad or burned onto a CD!

Features & benefits

The circular and square lens zoom gives the user the opportunity to zoom in for example a website link at the same time as they still can see the background. Therefore the context of the zoomed text is kept in focus.

MagniLink iMax always gives the user full access to all functions on the screen, for example the menu.

MagniLink iMax comes with high quality Text To Speech voices from Infovox iVox.
