

Ruby Handheld video magnifier

For the many people who need help reading text and seeing details traditional magnifying glasses work only up to a point. The RUBY video magnifier takes handheld magnification to the next level and beyond.

Its 4.3 inch full colour, high brightness WideScreen makes it outstanding for reading bills, letters and cheques. It is so small and unobtrusive that it easily slips into a pocket or purse as the perfect travelling companion for visiting the grocery store, the pharmacy, the bank, the library, bookstore, restaurant, or anywhere else.

The RUBY is easy to use for those who are unfamiliar with technology products. Just turn it on with one button, place it over an object and read. The unit stays flat on the table, and the magnified image appears in the display window. With only one button, you can adjust the screen from full colour for viewing pictures to any of four high contrast text modes.

Flip out the convenient handle and use the RUBY like a conventional magnifying glass – but see everything with enhanced contrast without distortion.

Press the Freeze Frame button to capture the image and bring it close for comfortable reading. You can now store up to 15 Freeze Frame images to reference later

Specifications

- Magnification Range: 1.5x to 10x with handle extended. 5x, 7.5x, and 10x flat on the paper
- Full colour mode and four enhanced contrast modes for reading: black text on a white background, white text on a black background, yellow text on a blue background, or yellow text on a black background
