

Sara CE Scan and Read

Freedom Scientific's SARA Scanning and Reading Appliance Camera Edition is an easy-to-use solution for reading a wide variety of printed material, including books, mail, newspapers, magazines, and so much more. SARA uses the latest in advanced optical character recognition technology to scan text and then read it aloud in crisp, clear speech. SARA automatically stores and remembers the contents of hundreds of thousands of scanned pages.

Start reading right away

You can start using SARA right out of the box, with no computer experience or training. Just place a printed page under the camera and SARA automatically recognizes the text and reads it to you with RealSpeak™ human-sounding speech. You can adjust the voice rate and volume as well as fast forward and rewind. If you want to take time to examine a document in detail, simply pause the reading, and use the intuitive navigational keys to read a word or a line at a time. You can even spell out words to get a better understanding of what is being spoken. Select a different voice, Scan and read in one of 18 languages, change the scanning mode to capture bound books, and save them on the internal hard drive or a USB thumb drive. Read one of the 222 classic novels that come already installed.

Large colour-coded keys with raised markings make the operation simple.

Features

- Plays audio books including Daisy books
- Can be attached to a computer monitor providing colourful, large print access to complement the speech
