

# Braille Sense OnHand

Smaller but smarter!

The Braille Sense OnHand with 18 Braille cells is the smallest and lightest NoteTaker in the world packed with features.

The Braille Sense OnHand has a built-in GPS receiver and an electronic compass for pedestrian navigation and it will guide you the more accurate route from the point where you are to your destination. It allows you to acquire neighbourhood information and POI (Points Of Interest) in real-time (Map data is optional).

The wireless LAN allows you to surf the web in Wi-Fi zones. Bluetooth is built-in. Several free games are included, such as "Learning Braille".

## External portable LCD(Optional)

Information on the Braille display can be shown on the external portable LCD. This can be helpful for teachers at school or parents at home to communicate with and check their students or children.

## Anytime, Anywhere, Play media.

The easy-accessible audio buttons are accessible to control the unit even when it is in its carry case. Built-in Daisy player and radio. Plays MP3, MP4, WAV, ASF, OGG, WMA, M3U, Audible, WMV, FLAC, MID files. Also records MP3/WAV files in stereo via built-in microphones or line-in.

The Braille Sense OnHand is small and light but provides a powerful variety of software programs such as a word processor, an address manager, a schedule manager, a media player, email, a messenger, a web browser and navigation. Braille Sense OnHand is a real multi-tasker capable of running up to seven programs simultaneously.
